

Project Lead the Way Crosswalk to Michigan
State Standards
Grades 9-12 Science, Math and Technology

Computer Integrated Manufacturing

**Created for:
Paul Kuwick
Eastern Michigan University**

Crosswalk Summary - Computer Integrated Manufacturing to Math
Standards

Math Standards in Michigan include 4 strands, 16 standards and 202 standard indicators. Project Lead the Way Computer Integrated Manufacturing consists of four (4) units of study with 119 performance objectives. The chart below outlines some of the crosswalk details as follows:

- Units of the course
- Number of performance standards within each unit
- The number of strands linked/standards linked/indicators linked
- The ratio of performance objectives linked within each unit
- 4/4 Math Strands are linked to objectives in the Computer Integrated Manufacturing.
- 9/16 Math Standards are linked to objectives in the Computer Integrated Manufacturing course.
- 27/119 Computer Integrated Manufacturing performance objectives link to Michigan 9-12 grade Math Standards
- This course links to 47/202 standard indicators.

Detailed matrices are attached showing (a) how performance objectives link to all standards in the Computer Integrated Manufacturing course, and (b) how performance objectives link to all components of the Michigan Math standards.

Unit	Performance Standards	Strand/Standard/Indicators Linked Performance Objectives	Performance Objectives Linked to Standards
1	19	4/6/36	15/19
2	59	2/2/6	12/59
3	26	0/0/0	0/26
4	17	0/0/0	0/17

Crosswalk Summary – Computer Integrated Manufacturing to Science Standards

Science Standards in Michigan include five (5) standards and 182 standard indicators. Project Lead the Way Computer Integrated Manufacturing consists of four (4) units of study with 119 performance objectives. The chart below outlines some of the crosswalk details as follows:

- Units of the course
- Number of performance standards within each unit
- The number of standards and indicators linked to performance objectives
- The ratio of performance objectives linked within each unit
- 1/5 Standards are linked to objectives in the Computer Integrated Manufacturing course.
- 13/119 Computer Integrated Manufacturing performance objectives link to Michigan 9-12 grade Science Standards
- This course links to 9/182 standard indicators.

A detailed matrix is attached showing exactly how performance objectives link to Michigan Science 9-12 grade standards and indicators in the Computer Integrated Manufacturing course.

Unit	Performance Standards	Standard/Indicators Linked To Performance Objectives	Performance Objectives Linked to Science Standards
1	19	1/4	2/19
2	59	1/3	7/59
3	26	1/6	4/26
4	17	0/0	0/17

Crosswalk Summary – Computer Integrated Manufacturing to Technology Standards

Technology Standards in Michigan include 6 standards and 44 standard indicators. Project Lead the Way Computer Integrated Manufacturing consists of four (4) units of study with 119 performance objectives. The chart below outlines some of the crosswalk details as follows:

- Units of the course
- Number of performance standards within each unit
- The number of standards and standard indicators linked to performance objectives
- The ratio of performance objectives linked within each unit
- 4/6 Standards are linked to objectives in the Computer Integrated Manufacturing course.
- 21/119 Computer Integrated Manufacturing performance objectives link to Michigan 9-12 grade Science Standards
- This course links to 10/44 standard indicators.

Detailed matrices are attached showing (a) how performance objectives link to all standards in the Computer Integrated Manufacturing course, and (b) how performance objectives link to all components of the Michigan Technology standards.

Unit	Performance Standards	Standard/Indicators Linked to Performance Objectives	Performance Objectives Linked to Tech Ed Standards
1	19	1/2	3/19
2	59	4/8	10/59
3	26	3/4	5/26
4	17	2/2	3/17
